

## PAY IN SIGHT FOR DISTRICT MILITIA

Correction of Muster Rolls Is Cause of Delay—To Load Escort Wagons.

"The men in the District militia will be paid tomorrow—if possible." This was the statement of Major W. P. French, United States army, who has been designated as paymaster for the District militia.

Major French said he regretted as much as any one the delay which caused the men to wait for their pay. He said the rolls of the companies contained mistakes, which have to be corrected before the troops can be paid off.

Two days at least the men expected to have to wait when they were informed that the rolls would all have to be gone over again once more.

**Army Officers To Pay Men.**

Captain Wilson said the paying off of the men had merely been transferred from an officer of the organized militia to an officer of the regular United States army. It is thought the reason for this transfer is similar to the one which requires Capt. Horace Hobbs, United States army, to issue the equipment of the troops after they have been mustered into the United States service, instead of the quartermaster corps of the District militia, which has heretofore issued all equipment to men in the national guard.

For the remainder of their stay, the officers of the First battalion will continue to complete any small details which may have been neglected until these last few days. They will go among the men and ascertain from them any little articles they need to complete their equipment.

**To Load Escort Wagons.**

It is expected loading of the escort wagons, which for some time have been standing idle at the camp, will start tomorrow. If the battalion finds that it can leave by Saturday, in these wagons will be stored all the equipment carried by the men on a march. The wagons will be transported on flat cars.

One difficulty found in taking absolutely green men into the battalion leaving for the border in a few days, is that they are unfamiliar with the maneuvers. It is surprising, however, with what rapidity the men are able to learn the movements when drilling with experienced soldiers.

## 5,000 TO TAKE PART IN ODD FELLOWS' OUTING

Thirty-three Lodges Join in Chesapeake Beach Excursion.

Thirty-three lodges of the Independent Order of Odd Fellows with the Rebekah and other auxiliary lodges of the order today join with the grand lodge of the District in an excursion to Chesapeake Beach.

Besides the District Odd Fellows, lodges from Baltimore and other Maryland and Virginia towns are expected to take part in the outing. When the representatives from these sections come together, more than 5,000 people, including the members of the fraternity and their families, are expected to be gathered on the beach.

The widows and children of deceased members of the order are to be honored guests. The outing is for the benefit of the Odd Fellows' Home recently purchased. Athletic games, races, and a baseball game have been provided for the amusement of the crowd.

## Ohio Guardsmen Only Ones Having War Balloon

AKRON, Ohio, July 13.—The Ohio national guard today is the only State militia organization equipped with an observation balloon ready for Mexican service. The artillery contingent, commanded by Major Harold M. Bush, has been presented a \$100,000 balloon, the only one of its kind in the United States, for observation purposes.

The War Department has ordered several like it for the regular army. The balloon, presented by an Ohio rubber company, is handled by Battery B.

## The Roll of Honor

[List of Recruits for District National Guard Thursday, July 13, for the Preceding 24 Hours.]

Charles J. Hurley, 1010 Second street southwest.  
David C. McGrath, 813 Twelfth street northwest.  
John R. Craig, Manassas, Va.  
Jacob J. Jacobsen, 930 I street northwest.  
John R. Larkin, Manassas, Va.  
David S. Cheseldin, 1105 C street southwest.

Randolph A. Rowler, 800 Eleventh street northwest.  
John P. Agnew, 308 S. Pitt street, Alexandria, Va.  
Thomas W. Pinch, Holmeade, Md.

## Military Road Planned Along Mexican Border

The War College today is giving consideration to a plan for a military highway along the Mexican border, from Brownsville, Tex., to San Diego, Cal.

The plan is one worked out by the good roads department of the American Automobile Association, which has laid before the War College a large number of maps and extensive data compiled in the last year. The proposal is to take advantage of that section of the \$55,000,000 good roads act signed by the President this week, which provides for military as well as post roads.

Under this law, Executive Chairman A. G. Batchelder, of the A. A. A., said today \$2,000,000 would be available, with Texas, Arizona, New Mexico, and California supplying half of it.

The principal purpose would be to enable rapid concentration of troops at any desired point along the border, a thing not now possible. The States would be repaid, Batchelder said, by the tourist traffic which such a highway would attract, and by the military protection.

The Mexican frontier highway is the name proposed. In the plans submitted to the War College roads already constructed, which could be incorporated into the highway, are shown.

Considerable good mileage already runs east from San Diego, Cal., and there are several short lengths in the Imperial Valley. A road is being built east from Yuma, Ariz., but as it is twenty miles from the border at its nearest point, it is not considered available from the military viewpoint.

Another thirty-mile stretch connects Yuma with Douglas, Ariz., but this is a macadam road running east from El Paso for twenty-eight miles, within a few feet of the border at many points.

The tentative plans propose the completion of the unfinished portions between San Diego and Yuma, the second section would be from Nogales, Ariz., across New Mexico to El Paso.

## To Quickly Relieve Soreness and Inflammation

Rub in a few drops of Absorbine, Jr. It is surprising how promptly it penetrates and acts—how clean and pleasant it is to use, and how economical, because only a few drops are required to do the work.

In addition to being a dependable liniment, Absorbine, Jr., is a safe, powerful, trustworthy antiseptic and germicide which doubles its efficiency and its uses.

When applied to cuts, bruises, and sores, it kills the germs, makes the wound antiseptically clean and promotes rapid, healthy healing. It relieves pain and inflammation promptly. Swollen glands, painful varicose veins, wens, and bursae enlarge—ment is rapidly reduced to the application of Absorbine, Jr.

Absorbine, Jr., is sold by leading druggists. Liberal trial bottle postpaid for 10c in stamps. W. F. YOUNG, P. O. Box 445, Temple St., Springfield, Mass.—Advt.

## MANASSAS FIRM JOINS D. C. MILITIA

Three Members of Real Estate Company Become Members of Guard.

One business establishment in Manassas, Va., closed its doors yesterday, and the population of that historic village fell off by three. It was not business depression that caused this result, but an inspiration of pure patriotism. The three members of the defunct firm are now full-fledged members of the organized militia of the District of Columbia.

John R. Craig, John R. Larkin, and Robert W. Whedbee, having grown up together, engaged in the real estate business in Manassas. When President Wilson called upon the national guard each of the young real estate brokers desired to respond to the country's call. Neither, however, was willing to go and defeat the ambition of his partners. Consequently, the question was amicably arranged yesterday by suspension of business, and the enlistment of all three.

The campaign for recruits for the District militia is now progressing quite satisfactorily. That all the comforts possible may be given to the new guardsmen, Harry Gladman, a real estate broker, has placed his automobile at the disposal of the recruiting officers and each of the newly enlisted men is given a motor ride from the office to Camp Ordway.

As a further attraction for the office,

the Third Regiment Band has arranged programs for nightly concerts at the recruiting headquarters.

Sgt. James H. McKnight who has been on sick leave, has returned to duty at the recruiting office.

The recruiting is going on at Camp Ordway much better than at the Pennsylvania avenue office. Yesterday forty-four men enlisted in the camp. They are:

George L. Anselvish, John W. Barber, Harry Blackman, Alfred C. Cadick, Cardwell S. Calhoun, Nicholas A. Caparelli, Bernard P. Crowley, William W. Curtain, Wallace H. Davidson, Bryan J. Donovan, George Essig, Douglas E. Frere, Charles A. Friches, James R. Hardy, Harry H. Hawes, Moses H. Jacobs, William V. Kuntz, Michael A. Ladeau, Charles V. Loy, Maurice P. McDonnell, James McKim, Frederick E. O'Brien, Benjamin H. Oliver, H. Frank Page, John R. Pierce, Lloyd Prather, William Reiley, Vincent Rutherford, Kenneth L. Sarr, Norman H. Sonnenman, William A. Stamler, Adrian P. Swann, Harris Turner, Philip H. Wood.

Separate Battalion recruits are: Lawrence Hicks, Edward Chase, Ernest F. Carter, Walter Giddings, William H. Hearny, John H. Parker, George Porter, Willie Quailo, California Darcey, George D. See.

## Militia Is Warned About Water Supply

The Brigade Headquarters of the District Militia camp are in receipt of an order from the headquarters of the Eastern department which warns the commander of each organization to take care that the men on the trains which carry them to Mexico are provided with a sufficient supply of drinking water.

This order has resulted from a fear that the men may be unable to secure a proper supply of water that is known to be free from disease germs. The order states that it would be well for each organization commander to take with the troops an extra barrel of water and keep it in the car in case of an emergency.

## STEAMER LOST AT SEA WITH 18 LIVES

Disappears After Sending Wireless Message That She Was Sinking.

NEW YORK, July 13.—The steamship Ramos, carrying coal from Philadelphia to Cartagena, apparently has disappeared, and it is feared she is lost.

The Marconi Wireless Company yesterday received at its Miami, Fla., station, an S. O. S. message from the Ramos declaring her engines were disabled and that she was sinking. She gave position 31° northwest, Watling Island. The steamer Van Hogendorp picked up the message and immediately rushed to the position given.

Late last night the Van Hogendorp reported that she had arrived at the spot named, but had found no trace of the Ramos. No further wireless calls were heard from the vessel. The Van Hogendorp reported early today she was still searching for the Ramos, but on account of the thick weather maintained little hope of finding the ship.

PHILADELPHIA, July 13.—The steamship Ramos, believed lost at sea, carried a crew of eighteen men and was commanded by Captain McGoold. The vessel, a freighter, built in 1885 at Newcastle, England, carried a cargo of 665 tons of bituminous coal. She is 190 feet long, 28 feet 3 inches beam, and has a gross tonnage of 141. She carried no passengers.

## Will Make 115 Nightcaps For Pennsylvania Guard

CONNELLVILLE, Pa., July 13.—At least one company of the Tenth Pennsylvania Infantry is not to suffer during the long vigil on the Texas border. Tomorrow the women of Mt. Pleasant will turn out at the armory to spend the day sewing for the soldiers.

Twenty-four in the armory are making 115 nightcaps for the members of Company E. Nightcaps are needed as a protection against insects.

## How to Prevent Acid Stomach And Food Fermentation

BY A NEW YORK PHYSICIAN.

"My experience in the treatment of stomach diseases has led me to the conclusion that most people who complain of stomach trouble possess stomachs that are absolutely healthy and normal. The real trouble, which causes all the pain and difficulty, is excessive acid in the stomach, aggravated by food fermentation. Hyperacidity irritates the delicate lining of the stomach, causing that full bloated feeling. Thus both acid and fermentation interfere with and retard the process of digestion. The stomach is usually healthy and normal, but irritated almost past endurance by these foreign elements—acid and wind. In all cases—and they comprise a vast majority of all stomach difficulties—the first and only step necessary is to neutralize the acid and stop the fermentation by taking in a little warm or cold water immediately after eating, from one to two teaspoonfuls. Cold water, however, is the most effective antacid and food corrective I have ever found. The excess acid will be neutralized and the fermentation stopped almost instantly, and your stomach will at once proceed to digest the food in a healthy normal manner. Be sure to ask your druggist for buffered magnesia which is recommended for acid stomach conditions.—Advt.
